## Oral Care Rabbit

This product meets the requirements of EN71.

### Instructions for use:

- Wash Oral Care Rabbit before first use.
- To use the product simply put your fingers in the rabbits ears and softly rub your baby's teeth or gums.
- Clean regularly and between each use with warm water.
- Machine washable up to 40°C.
- Do not bleach.
- Can be tumble dried (low temperature only) and ironed (low temperature only).
- Do not dry clean.
- Do not sterilise! Not suitable for any sterilising method, including microwave sterilisation, steam sterilisation or cold water sterilisation.

### For your child's safety and health

#### Warning!

- Inspect product before and after each use and discard if worn or damaged!

Cotton terry: 80% Cotton, 20% Polyester, Microfi ber: 83% Polyester, 17% Nylon, Lycra knitted: 84% Nylon, 16% Spandex

## Training Brush / First Brush / Learn To Brush Set / Massaging Brush

**Attention! This is not a toy – always use with adult supervision.**

This product meets the requirements of EN71-3.

These products meet the requirements of EN ISO 20126:2012.

### Instructions for use:

- Clean toothbrush regularly and between each use with warm water.
- Inspect toothbrush before and after each use and discard if worn or damaged.
- Do not boil, steam or microwave sterilise. Do not put in the dishwasher.
- Replace toothbrush regularly (after 1 – 2 months use).

### For your child's safety and health

#### Warning!

- Toothbrushing should be supervised by an adult.
- Do not let your young child walk or crawl around with the toothbrush in his/her hand or mouth.

## Bite & Brush / Starter & Clip

The teether meets the requirements of EN71.

The clip meets the requirements of European Standard EN 12586:2007. The clip should only be attached to a garment.

### Teether instructions for use:

- Sterilise the teether before first use
- Dishwasher safe (in top rack to a max. temperature of 65° C).
- Clean regularly with warm, soapy water.
- Can be sterilised by boiling, cold water method, steam and microwave steam sterilising.

### For your child's safety and health

#### Warning!

- Inspect before and after each use and discard if worn or damaged!

### Teether instructions for use:

- The hook & loop fastener securely holds not only teethers but also ring soothers, small toys and much more (Diagram A).
  - The clip fastener is opened by moving the slider towards the leash and closed by clicking the slider towards the rounded end (DiagramB).
  - The clip should only be attached to garments.
  - The clip fastener should always be stored and cleaned in the open position to avoid the clip spring losing its strength.
- Do not store in closed position.
- Regularly clean the clip with warm water and a mild cleaning agent. Rinse thoroughly. DO NOT BOIL, steam or microwave sterilise.
  - Do not use solvents or abrasive cleaning agents as these could damage the product.

## For your child's safety

### WARNING!

- Before each use check carefully. Throw away at the first signs of damage or weakness.
- Never lengthen the soother holder!
- Never attach to cords, ribbons, laces or loose parts of clothing. The child may be strangled.
- The use of a clip with a sleeping baby, as well as in bed, crib, cot or perambulator is not recommended.
- Ensure both ends of the clip are fastened before leaving your child unattended.
- The clip should not be used as a teether or toy.

## Mini Cooler & Clip

The teether meets the requirements of EN71.

The clip meets the requirements of European Standard EN 12586:2007. The clip should only be attached to a garment.

### Teether instructions for use:

- Wash before first use and regularly with hot water and mild detergents.
- Dishwasher safe (in top rack to a max. temperature of 65° C). Food colourings may discolour components.
- For optimum cooling effect, put the teether in the refrigerator for one hour.
- Cool only in a refrigerator. Do not place in the freezer compartment.

### For your child's safety and health

#### Warning!

- Inspect teether before and after each use and discard if worn or damaged!
- Do not boil, steam or microwave sterilise. For cleaning wash with hot water.
- The teether is for children between 0-3 years. Older children can bite through the waterfilled section. The waterfilling is harmless and controlled regularly.

### Teether instructions for use:

- The hook & loop fastener securely holds not only teethers but also ring soothers, small toys and much more (Diagram A).
- The clip fastener is opened by moving the slider towards the leash and closed by clicking the slider towards the rounded end (DiagramB).
- The clip should only be attached to garments.
- The clip fastener should always be stored and cleaned in the open position to avoid the clip spring losing its strength. Do not store in closed position.
- Regularly clean the clip with warm water and a mild cleaning agent. Rinse thoroughly. DO NOT BOIL, steam or microwave sterilise.
- Do not use solvents or abrasive cleaning agents as these could damage the product.

### For your child's safety

#### WARNING!

- Before each use check carefully. Throw away at the first signs of damage or weakness.
- Never lengthen the soother holder!
- Never attach to cords, ribbons, laces or loose parts of clothing. The child may be strangled.
- The use of a clip with a sleeping baby, as well as in bed, crib, cot or perambulator is not recommended.

- The clip should not be used as a teether or toy.

## Cooler, Bite & Play, Mini Cooler

The teether meets the requirements of EN71.

### Teether instructions for use:

- Wash before first use and regularly with hot water and mild detergents.
- Dishwasher safe (in top rack to a max. temperature of 65° C). Food colourings may discolour components.
- For optimum cooling effect, put the teether in the refrigerator for one hour.
- Cool only in a refrigerator. Do not place in the freezer compartment.

### For your child's safety and health

#### Warning!

- Inspect teether before and after each use and discard if worn or damaged!
- Do not boil, steam or microwave sterilise. For cleaning wash with hot water.
- The teether is for children between 0-3 years. Older children can bite through the waterfilled section. The waterfilling is harmless and controlled regularly.

## Bite & Relax Phase 1 / Phase 2

The teether meets the requirements of EN71.

### Instructions for use:

- Sterilise the mini teether before first use.
- Can be sterilised by boiling, cold water method, steam and microwave steam sterilising.
- Dishwasher safe (in top rack to a max. temperature of 65°C). Food colourings may discolour components.
- Clean regularly with warm, soapy water.
- Do not worry if the Bite & Relax teether becomes lodged in the mouth. It can not be swallowed and is designed to cope with such an event. Remove as gently as possible.

## For your child's safety and health

### Warning!

- Inspect mini teether before and after each use and discard if worn or damaged!

## Steriliser Box

### Instructions for use:

- Remove tamper-proof closure and any stickers from the box.
- Remove plastic inlay from box (fi g. A).
- Wash mini teether and box with mild soapy water and then rinse with clear water before use.
- **When using the self-sterilising method, please ensure the teether, box and microwave (including the waveguidecover and turntable) are COMPLETELY CLEAN and free from dirt, food residue, fat or oil splashes. If not, this could lead to the product or box melting and the microwave sparking or the waveguide cover burning!**
- Hold box and fill to the mark with 25ml / 0.9 fl oz of water (fi g. B).
- Place mini teether in the box.
- Close box and heat in the microwave at 750 – 1,000 watts for 3 minutes (fi g. C).
- Follow the user-manual-instructions of your microwave. Don't put the steriliser box at the center of the turntable. Don't leave your microwave unattended during sterilising process! Stop the microwaving-process immediately if whole water is vaporised.
- Allow to cool for at least 10 minutes.
- Open microwave. CAUTION! The box, water and the mini teether may still be very hot after the 10 minute cooling period!
- Open box and drain remaining water. Leave mini teether to dry in slightly open box.
- Check the temperature of the mini teether before use!
- Improper water level, power level or time setting can damage the microwave, mini teether and box and result in poor disinfection!
- For use only with MAM mini teethers!
- Keep steriliser-box away from children.
- After microwave sterilisation, mini teethers kept in the closed box will remain disinfected for a minimum of 48 hours.

Disinfected in 3 minutes – for up to 48 hrs.

## 7. Developmental Toys

### MAM Friends Lucy/Elle/Max/Bob

#### Instructions for use:

- Before the first use boil the product for 5 minutes. Afterwards it is not recommended to boil the product again, as regular boiling may damage the product over time.
- For regular cleaning, only wipe the surface with a damp cloth and air dry. Do not sterilise or boil as this might damage the product over time.
- Do not place in a dishwasher or microwave.
- Do not put into the freezer.
- This is not a bathing toy, do not leave soaking in water.
- Do not store exposed to direct sunlight.

## For your child's safety and health

### Warning!

- Inspect before and after each use and discard if worn or damaged!
- Packaging is not a toy! Remove all packaging prior to use.
- Note that due to the natural rubber material slight discolouring might occur.

Produced from natural rubber latex. Be cautious if known to be allergic to latex.
